AI Developer with 3+ years of hands-on project-based development experience. Builds AI-powered applications end-to-end - from product concept and architecture to backend, interface, model integration, testing and deployment. Experienced in LLM applications, computer vision, AI workflow orchestration, data pipelines and rapidly delivering functional MVPs across different domains.

Experience

Independent Project Development: 2023 – Present.

COMPASS AI – AI Developer

2026 – Present

Tech: Python, FastAPI, PyTorch, scikit-learn, Pandas, NumPy, Streamlit, ONNX, Plane API, Ollama, Qwen

- Delivered an end-to-end local AI decision-support MVP for task-to-employee assignment, combining data import, feature engineering, ML scoring, ranked recommendations, explanations and interactive workflows.
- Integrated six matching approaches, including rule-based logic, classical ML models and a PyTorch MLP; achieved ROC-AUC 0.859, MRR 0.944 and P@1 0.893 on 375 held-out tasks.
- Built the product layer with FastAPI and Streamlit, supporting CSV/JSON/Parquet ingestion, bulk assignment, Kanban workflows, training sessions, reports and Plane project-management integration.
- Added local Qwen/Ollama explanations, ONNX inference, model comparison, fairness reporting and modular orchestration for task analysis, team matching and recommendation generation.

Face-Swap-Studio – Computer Vision AI Developer

2025

Tech: Python, FastAPI, OpenCV, NumPy, InsightFace, ONNX Runtime, PyTorch, HTML/CSS/JavaScript, macOS

- Built a local AI media application that unifies nine face-swap and head-model backends behind one workflow with model readiness checks, isolated runners and configurable processing pipelines.
- Implemented multi-image and multi-face workflows with face detection, target-face mapping, batch generation, optional GFPGAN restoration and Real-ESRGAN upscaling.
- Developed the FastAPI backend, browser interface, temporary-file isolation, output archives, model status checks and Apple Silicon/MPS-compatible local packaging.

IT-Interview – AI Product Developer

2026

Tech: React, TypeScript, Vite, React Markdown, Tailwind CSS, GitHub Actions, Markdown/JSON content pipelines

- Built a bilingual React/TypeScript web application around a large Russian/English IT interview knowledge base containing 56k+ questions per language across engineering, data, product and behavioral topics.
- Implemented a build-time content pipeline that imports an external repository, recursively processes Markdown files, generates normalized JSON, hierarchical table-of-contents trees, question IDs and rendered answers with code blocks and tables.
- Developed topic navigation, subtopic filtering, question marathon mode, randomization, answer reveal, responsive layouts, dark mode and GitHub Pages CI/CD with repository-dispatch rebuilds.

Botyan – LLM Application Developer

2023 – 2024

Tech: Python, asyncio, aiogram, discord.py, OpenRouter/OpenAI-compatible APIs, JSON, Pillow, MoviePy, ffmpeg

- Built an asynchronous cross-platform LLM application for Telegram and Discord with shared conversation history, platform-specific command handlers, access control and parallel bot runtimes.
- Integrated contextual LLM workflows using up to 100 recent messages for chat responses and up to 1,000 messages for image-caption generation, with API-key limits and status commands.
- Developed persistent economy and media-processing workflows with JSON storage, Pillow, MoviePy and ffmpeg, including captions, demotivator generation, image delivery and Telegram video-note effects.

Skills

Technical: Python, TypeScript/JavaScript, React, FastAPI, PyTorch, scikit-learn, ONNX Runtime, InsightFace, OpenCV, Pandas, NumPy, Streamlit, asyncio, aiogram, discord.py, OpenRouter/OpenAI-compatible APIs, Ollama, Qwen, REST APIs, Vite, Go, GitHub Actions, Docker, Git.

Languages: English – C1 (Advanced); Russian – Native.

Education

SAINT PETERSBURG STATE UNIVERSITY OF AEROSPACE INSTRUMENTATION (SUAI) – Saint Petersburg, Russia

- Master's Degree, Management – Strategic Human Resource Management 2027
- Bachelor's Degree, Software Engineering – Software Systems Design 2025
- Professional Retraining Diploma – Web and Multimedia Applications Developer 2024
- Additional Professional Education: 250+ certificates and diplomas from 60+ universities, companies, educational platforms, institutes, and professional training programs worldwide, covering diverse academic and professional fields and disciplines.
